

The official data used for billing are the ones presented in the table below.

As a guideline, and so that customers can have full information, S3NS is also sharing the method used to arrive at those prices :

- A premium of 20% is applied to prices in west-9, which can be found here: [SKUs | Google Cloud](#)
- Then the conversion rate is applied

The table below is a guideline and will be confirmed one month ahead of General Availability. The list only covers a subset of the service that will be made available at General Availability.
